

# TI-SmartView 30XII MultiView

## Product Images

## Short Description

TI-SmartView is a presentation software for the TI-30X that helps the teacher to show the functions of the calculator.

## Description

---

TI-SmartView™ software can display the calculator to students without using calculator-specific projection equipment. The software also has additional features that facilitate presentations and demonstrations.

**Usage:**

Repeat demonstrations quickly and easily by using scripts to play a series of keystrokes.

View input history and a large version of the current calculator screen, and open a script by displaying the keystroke history window.

Complete the calculator screen using the screenshot feature.

Take screenshots when developing a concept.

Review the history of screenshots to repeat the steps performed in an activity.

Save the screenshots and use them in other documents.
