

# Fellowes Ergonomics Mouse Pad

## Product Images

## Short Description

Soft foam cushion that moulds to the wrist for maximum comfort, but never loses its shape. Retains body heat for improved circulation. Distributes pressure points and ensures correct hand position when using a mouse.

## Description

---

Ergonomic design is about creating a working environment that suits the need for comfort and correct posture. The design must complement, rather than force adaptation. Good ergonomic design reduces the risk of long-term problems such as back pain and musculoskeletal disorders.
