

# Dana Aqua Universal Adhesive 301 100ml

## Product Images

## Short Description

---

Aqua Universal Adhesive 301 is a versatile water based adhesive, which gives a slightly flexible translucent joint with high strength.

## Description

---

Aqua Universal Adhesive 301 is a versatile water based adhesive, which gives a slightly flexible translucent joint with high strength.

Suitable for bonding most porous and non-porous materials, such as stone, glass, metals, ceramics, most plastic types and lacquered surfaces, polystyrene foam, wood, leather, rough textiles, paper and cardboard.

The adhesive cures when drying, and should therefore only be used for small areas, if both surfaces are non-porous.

The glue fulfils the requirements of the Association for Art- and Hobby materials, and is placed in group A.

Type: Modified polyvinylacetate.

Colour: White, slightly yellow.

Consistency: Liquid.

Shelf life: Minimum 2 years in tightly closed packing, if stored cool.

Should be protected from freezing.

## Additional Information

---

Brand	Dana Lim
Type	Universal Glue
Colour	White
Size	100ml
GTIN	5706360001187
Vendor SKU	301100
Sales Unit	ST
