

Tree Free Document File A4 10pcs

Product Images

Short Description

The Tree-Free line is produced with cardboard that is made from agricultural waste. Yes, you are reading this correctly, agricultural waste! The cardboard is made from leaves and stems that normally would be burned in the open air. Not a single tree is used in these files!

Description

Together we take care of people and the environment! Trees don't have to be cut down, agricultural waste gets a second life and farmers earn more for their harvest. Go Tree-Free! A lot of agricultural waste is burned in the open air which results in CO2 emissions. By recycling agricultural waste into cardboard, it gets a second life and the CO2 remains stored in the cardboard. The environmental impact of this cardboard is 47% lower than cardboard from trees and 29% lower than recycled cardboard. By buying these folders, small-scale farmers in developing countries receive income not only for the crop but also for the agricultural waste. No trees are used in this cardboard. Product specification: Ideal for storing and transporting documents. With 3 flaps so documents will not fall out. Packed per 10 pieces. Size: (A4) 21 x 29,7 cm.

Additional Information

Brand	DJOIS
Type	Office Folder
Quantity Per Unit	10
